City, State, ZIP:

Make:

Model:

Year:

License Plate No.: \*

Current Mileage:

Phone Number: \*

Email Address: \*

*(From your Vehicle Inspection Report:)*

Test Date:

SID #:

**\* Required information**

A vehicle owner may participate in the program if **ALL** of the following criteria are met:

---

1. The vehicle has taken and failed an emissions test.
2. The vehicle being repaired is titled in the State of Arizona, has taken the emissions inspection test pursuant to ARS 49-542, subsection A, has been registered during the immediately preceding 12 months and has not been unregistered for more than 60 days.
3. The vehicle being repaired is at least 12 years older than current calendar year.
4. The vehicle owner shall apply to the program, not more than 60 days after failing the emissions test.
5. The emissions control system has not been;
  - Tampered with;
  - Removed or disabled, in whole or in part.
6. The vehicle shall be taken to an **Approved Repair Facility**.
  - A list of Approved Repair Facilities will be provided after vehicle is qualified;
  - OBD II vehicles will receive the list of participating repair facilities at a waiver lane.
7. The vehicle must be presented to a participating repair facility for repairs no more than 60 days from the date of qualifying for the VVR Program to be eligible for the program for that current registration cycle.
8. The vehicle must be inspected and retested at an Emissions Waiver Station within seven (7) days of the repairs. The participating repair facility may take the vehicle for the customer for a fee of \$25.00 if customer is unable to do so. The \$25.00 charge is not to be included in the \$700.00/\$1,000.00 repair cap.

**Notes:** Participation in the program is limited to one vehicle per registered owner per year.

Motor homes, motorcycles, salvage vehicles and fleet vehicles are **NOT ELIGIBLE** to participate in the program.

If qualified, the owner of the vehicle will pay the first \$150.00 as a co-payment to the designated participating repair facility. The State will pay up to \$550.00 in emissions-related repairs for a total of \$700.00 per vehicle. This limit applies to all gasoline and light duty diesel vehicles, 8500 GVWR or less.

Heavy duty diesels, 8501 GVWR or more, have a \$1,000.00 limit in emissions-related repairs. Vehicle owners shall be responsible for one-half of the costs of the qualified emissions repairs and the other half of the costs shall be funded from the program, up to \$1,000.00.

Vehicles that require more than \$700.00/\$1,000.00 in emissions-related repairs are not eligible unless the owner agrees to pay the additional costs. If, after the repair facility provides its diagnosis and estimated costs for repairs, the customer decides they do not want to participate in the program (prior to any repairs being started), the customer will be responsible for a **\$75.00** diagnostic fee (opt-out) to be paid directly to the repair facility. If the owner "opts-out", the vehicle will not be able to qualify for the VVR Program until the vehicle's next registration cycle.

If the owner does not complete the required process of pre/post emissions testing, the owner shall not be reimbursed for any repairs and shall be responsible for paying the Approved Repair Facility for the costs of the **entire** repair.

Under penalty of perjury, I, the owner of the vehicle, do solemnly swear that the information provided in this application for the Voluntary Vehicle Repair Program is true.
