

Work-in-Progress Worksheet

Overview

The ComEd Energy Efficiency Program Work-In-Progress Payment is available to qualifying customers to help advance the implementation of an Industrial System Study project. We will provide a portion of the expected incentive payment, prior to project completion, that will not exceed the purchase order amount for the materials needed to implement the project.

The remainder of the incentive is provided after study recommendations are properly implemented and verified. Eligible annual kWh savings are determined through final measurement and verification activities. The total incentive payment of \$0.18 per annual kWh saved will not exceed the total eligible implementation costs and the total eligible incremental costs for improvements recommended in the study.

Directions: Please save a copy of this form to your computer by selecting "FILE/SAVE AS" before entering text and numbers. Then fill in your information electronically and select "SAVE." Note that this form requires Adobe Reader® version 11.0 or greater to function properly. Download the most recent version of Adobe Reader® at <http://get.adobe.com/reader>.
