

INITIAL MEDICAL QUESTIONNAIRE

The purpose of this questionnaire is to help protect you against possible illness that may be caused by working around animals, animal bedding or animal waste. In order to be useful, it is necessary that we review information about what you do in your work, as well as information about your general health status.

- **Completion of the questionnaire is a REQUIREMENT for your job**
 - To receive federal funds for research, the NIH requires an institution to provide an occupational health program to its employees who work with or around animals. In addition, MSU has elected to become accredited by AAALAC which also requires such a program. The program requires MSU to assess the risk to each employee with animal contact.
- **The information you submit is CONFIDENTIAL, and will only be reviewed by health professionals within the University Physician's Office**
 - The health questions are related to 3 main health issues:
 - 1.) Respiratory allergies including asthma caused by working around animals.
 - 2.) Zoonotic diseases (infectious diseases from animals).
 - 3.) Immunosuppression, which may increase your risk of zoonotic diseases.
- **After reviewing the questionnaire, you will be notified of the results of the review**

We strongly recommend that you become familiar with the hazards associated with your job and use this information to minimize your risk of developing a work-related injury or illness.
